Lighting Products for the New Look of Today's Restaurant

Illuminate the Senses

With the advent of the fast-casual restaurant segment, the latest focus has shifted from the drive-thru window to inside dining. Customer expectations have been elevated to new levels, driving restaurants to recreate their image through the remodeling of older sites. The emphasis today is on creating a dining environment that is exciting, comfortable, and most of all, fresh.

It's How We Make You Look!

Enhanced dining room and lobby lighting will provide the illumination necessary for your new décor to be seen, while becoming a key ingredient in the fresh, new look of your restaurant. We offer a large selection of decorative interior and exterior luminaires to create an ambience that is remarkably inviting at factory direct pricing and easy to digest. The lighting specialists at Security will assist you in developing a lighting design that is both relevant and cost effective.

The Whole Is Less Than the Sum of the Parts

Don't invest in parts for your old, tired lighting system. A replacement ballast, lamps and lens are more expensive than a brand new fixture. Plus new fixtures give you the opportunity to take advantage of today's more energy-efficient lighting products while updating your image.

Decorative Lighting

Ambient Lighting

Emergency/Exit Lighting

Accent Lighting

Savor the Ambience with Light Layering That Adds New Life to Your Restaurant Décor

None are the days of flat, lensed illumination. Today's lighting must be relevant, adding to your customers' dining experience. Security Lighting will energize your new décor through light layering that will allow your customers to see your restaurant in a whole new light.

Ambient Lighting

Begin with an appropriate amount of general illumination that will serve as the main ingredient of a tasteful lighting experience. Choose from our broad menu of parabolic and recessed downlighting fixtures available in many sizes, styles and colors.

Accent Lighting

Add a splash of accent lighting to illuminate the senses by highlighting artwork and décor features for greater depth and dimension. You can create these effects by using our wall wash downlights, track or specialty fluorescent luminaires.

Decorative Lighting

Add sizzle to your new floor plan with decorative lighting fixtures that are sure to capture your customers' imagination. No other lighting company can offer a greater selection of decorative chandeliers, pendants and sconces than Security Lighting.

Emergency/Exit Lighting

Finish your new look by cleaning up your emergency and exit lighting. Free up limited wall space by hiding required emergency lighting within your ambient lighting luminaires and update existing emergency and exit lights to new combination units.

Leave Your Competition Standing In the Dark

Your Customers Will See You in a Whole New Light

Make A Visible Difference with Exterior Lighting

Don't let the investment in your new interior go unnoticed. With better than 50% of today's restaurant business based on impulse stopping, coupled with longer hours of nighttime operation, customers must notice your 'outside' to get to know you on the 'inside'. We offer a full exterior lighting package that provides nighttime visibility essential to your after-dark hours of operation, including soffit, parking lot, roof and landscape lighting.
