Self Storage Lighting

Performance-Designed Lighting Products

The Self Storage industry has grown rapidly in recent years as the need for additional space has increased. To meet this elevated storage demand, the number of new facilities has grown and created greater competition. To remain competitive, it is important that owners, contractors and specifiers make lighting selections that will keep facilities safe, secure and attractive.

Security Lighting, a division of Hubbell Lighting, has developed a series of luminaires specifically for the self storage industry. These luminaires cover every aspect of your storage facility including the resident manager apartments. Security Lighting makes it easy to efficiently illuminate your facility because our application engineering staff will help design your lighting layout, provide detailed drawings for installation and guarantee on-time delivery to your job site with a warranty second-to-none in the lighting industry today.

Outside

Light the Way to Higher Profits

Results have shown that increased facility visibility and positive curb appeal are a direct result of proper exterior lighting. Site illumination contributes greatly to user safety and patrons are more likely to select a storage facility that includes high illumination for parking, walkways and building perimeters. Security Lighting offers a complete selection of luminaires for landscape, facades, parking lots, driveways and walkways in the colors and styles to complement your building décor.

Inside

Keep Your Customers Coming Back

Heighten your customers' on-site experience with clean, even interior illumination that provides a bright, safe and secure environment. There is no need to settle for a limited lighting selection when Security Lighting has you covered from storage and retail areas to the manager's apartment and office. All fixtures are energy efficient and ruggedly built for low maintenance and durability.

Security Lighting

You have the advantage of volume and shipping discounts, with a single source responsible for delivering your lighting package. Select Security Lighting as your lighting provider and relax knowing the job will be done right!

The Leader in Lighting for the Self Storage Industry

Let us put our experience to work for you! We understand which lighting systems work in self storage facilities and which ones do not. We design lighting systems specific to your facility requirements that provide the feeling of safety and security for your customers and their belongings. A well-illuminated facility attracts customers and keeps them coming back.

Product Dependability and Performance

Our experience with engineering outdoor and indoor luminaires has led to optimal combinations of fixture selections and design options. You are assured of the highest quality and products that are reliable, energy-efficient and require minimal maintenance.

More Options to Customize Your Facility

We sell you what you need, not what we want you to have, and we will keep your project on budget. Security Lighting offers multiple options in products, light sources and sizes for any type of storage application. Our experienced lighting professionals will design a lighting system for your unique application, and provide lighting layouts/fixture specifications for client submittals.

Our fixtures are available in a variety of standard colors to blend with your architectural styling and we can custom finish to your special preference. Security Lighting can also custom design lighting fixtures for a special one-of-a-kind signature look.

Outdoor Lighting

Parking Lot, Pole & Driveway Lighting

Don't miss an opportunity to make a great first impression! Pole lighting is available in a variety of wattages, pole heights and high-endurance powder finishes to match your facility décor. Safely direct traffic and allow customers to move around your site.

Building and Drive Path Lighting

Illuminate your building perimeter with excellent uniformity for increased customer visibility and safety. Security Lighting offers you multiple choices of high-performance fixtures that are stylish by day and dependable by night. Let your customers see you in a whole new light.

Landscape Lighting

Take full advantage of your landscaping investment and provide illumination as an aesthetic enhancement during the evening hours. Multiple floodlight and low-level lighting options provide uniform illumination for foliage and building accent lighting.

Indoor Lighting

Hallway Lighting

Security Lighting offers your choice of 1x4 recessed fluorescent troffers or a variety of strip lighting sizes to provide a safe measure of illumination for your corridors.

Unit Lighting

Don't keep your customers in the dark! Illuminate your unit storage areas with economical open strips and protected incandescent fixtures, which provide a safe level of illumination to access individual storage units.

Office/Retail Area Lighting

Security Lighting has a full line of recessed downlights, as well as lensed or parabolic troffers to suit any retail environment. Choose from incandescent or energy-saving fluorescent lamp options.

Emergency and Exit Lighting

On call 24/7, emergency and exit lighting fixtures safeguard your customers and employees in the event of a loss of AC power. Security Lighting's LED exit fixtures are Energy Star certified using as little as 4 watts per sign and saving up to \$80.00 per year over incandescent versions with lamp life in excess of 20 years.

Manager's Apartment Lighting

Add the finishing touch to your facility's residential quarters with decorative illumination choices and styles that will make any manager proud. Security Lighting offers a complete package of residential fixtures in the choices you desire when building or remodeling your manager's apartment.

Security Lighting

Security Lighting is a manufacturer of commercial lighting products with a primary focus on catering to the needs of the self storage industry and specialized applications such as restaurants, oil/convenience, hospitality and retail markets.

Our marketing concept is based on a "customer first" approach, providing you the opportunity to communicate with our factory sales force and experience a level of service second-to-none in the lighting industry today. From our factory to your site, let Security Lighting provide you with lighting beyond expectations.

Warranty Information

Security Lighting offers the best warranty in the business. It includes parts and labor, and is fully transferable to the facility owner or operator. Security Lighting provides piece of mind and a worry-free lighting system that you can always depend on. Our no-hassle customer service department stands ready to assist you.
